ARIVA SYNTHETIC SHEETS POWERED BY MGX

All members of the Ariva Digital Synthetic family are powered by the technology of Masterpiece Graphix, a leader in digital printing-optimized coatings and treatments, and are cross-platform compatible. They are optimized for use with HP Indigo equipment right out of the box.

WALL GRAPHIC WHITE VINYL 6 MIL

Don't let the name fool you—Ariva 6 mil wall graphic can be used anywhere! The ultra-removable adhesive allows for clean removal from most surfaces, including paper, painted walls, floors, metal, wood, and synthetic material. Unlike other removable products, this will not become permanent over time. Perfect for small-run product labels or wall advertising, our 6 mil wall graphic is a perfect substitute for magnets, providing better return on investment.

- Repositionable

GLASSMATE CLEAR AND GLASSMATE WHITE

The companion to 6 mil Wall Graphic, our Glassmate products are designed specifically for use on glass surfaces, indoors or out. Window decals produced using Glassmate remain affixed for as long as required, yet are easily removed without leaving residue. Can be applied wet or dry—the film can even be washed and reapplied without losing adherence. Typically lasts 5 years when applied to interior windows and 1 year when applied to exterior windows.

- Repositionable
