

Infinity® Spring Sale!

Manage your job. Manage your colours.

Have a job or campaign crossing a variety of print platforms?

Gilman Brothers Infinity from Ariva® is a 100% styrene-faced, **bendable** board which can be printed, **shipped flat**, then **cold bent** to set up into a **3D presentation**, or even wrap around a pole!

North American made · Limited preparation/clean up · 7% less ink required for complete coverage

Infinity from Ariva is part of the Gilman Brothers ColorOne™ White Point Management System. All Gilman Brothers board products, like Insite Reveal from Ariva, have consistent white points. Thus colour management regardless of the Gilman Brothers substrate used is easy.

Have a job or campaign crossing a variety of print platforms – small format digital (toner or HP Indigo), conventional offset and flatbed UV inkjet? Tango from Ariva has the same white point as all Gilman Brothers foam board products.
