

Pressure Sensitive Media

FLEET GRAPHICS PRESSURE SENSITIVE CAST VINYL – SOLVENT/ECO

MPI 1105 Supercast films provide improved conformability along with easy application and long-term removability. Combined with Avery DOL films, you'll achieve great printability and colours that pop. We stock Avery MPI 1105 Supercast Easy Apply RS™ with LTR (long-term removable) technologies to meet most vehicle, fleet graphic or architectural application needs.

Easy Apply RS™ – Facilitates the positioning of the film as it 'stands-off' the adhesive from the surface until pressure is applied. This makes applications easier, as the film can be slid into the correct position, reduces application time and thus lowers overall job costs.

LTR – Long-term removability is a proprietary technology that enables the film to be removed cleanly for up to five years.

Avery DOL 1360 Z 1.3mil optically clear gloss is a premium cast overlamine with outstanding conformability making vehicle wraps even easier. Ultra-thin 1.3mil film ensures graphics will conform easily. Eliminates 'silvering' effect on UV-printed images.

FEATURES:

- Enhanced conformability provides resistance to tenting and lifting
- Expanded colour gamut capability
- High gloss and smooth face make images and colours pop

BENEFITS:

- Faster, easier installation
- Stays down over complex curves and rivets, improving long-term look of graphics
- Image consistency with no costly reprints
- Smooth, paint-like finish

AVERY MPI1105 EZ RS GLOSS CAST REMOVABLE 2MIL | SEUL

| PRODUCT SKU | SIZES | CORE | PRINT SIDE | RPC* | SQ. FT. |

Can be purchased as a bundle.

MOUNTING, MASKING & MISCELLANEOUS

MACtac's application tapes – also known as Premask – are designed to assist in the application and transfer of pressure sensitive decals. Additionally employed for protection of screen printed, digitally printed or polished surfaces during storage or shipment. Available in medium tack (MACtac 210) for large format graphics or high tack (MACtac 220) for cut vinyl graphics.

MACtac's Paint Mask is a specialty vinyl film with an ultra-removable adhesive most often used in the application of decals and letters. It also functions as a mask for custom painted graphics.

MACtac's Permacolor Gemini XT is an economical general purpose mounting film designed with one release liner and a rubber-based high bond adhesive for use on all types of surfaces. PP5600 consists of a thin, clear polyester film coated on both sides with a clear rubber-based, pressure sensitive adhesive. A white, polycoated 2-side, moisture stable paper liner protects the adhesive.
